

FREEDOM

ALLIANCE

OLIVER L. NORTH
Founder and Honorary Chairman

THOMAS P. KILGANNON
President

Dear Fellow American,

I urge you to sign and return the enclosed PETITION TO PRESIDENT BARACK OBAMA.

Your Petition lets the President know that you strongly oppose his new energy scheme to control "greenhouse gas emissions" here in America.

It's called "Cap and Trade."

But in truth it should be called "Cap and Tax."

And it will dramatically raise the cost of everything we need that depends on energy -- from food to gas to heating oil.

It will also vastly increase the federal government's control over our lives, our income, our businesses and our lifestyles.

And here's why:

++ Obama's energy scheme will set a limit, or "cap," on carbon dioxide emissions from fossil fuel use.

++ The effect of such a "cap" would be to impose rationing of coal, oil and natural gas on the American economy.

++ Each utility company and manufacturing plant would be given allowances based on past emissions or some other formula.

++ Those companies that emit less carbon dioxide than permitted by their allowances could "sell" the excess to those companies that do not.

++ That's why they call it "Cap and Trade".

++ But over time, the "cap" would be ratcheted down, requiring even greater cuts in emissions, greater government control and higher and higher costs for you, me and our children.

Never mind the fact that there is no proof of man-made global warming.

Never mind the fact that Europe's "Cap and Tax" policies have failed
Over, please...

to lower greenhouse gases.

Never mind the fact that the world has actually been cooling for the last ten years.

And never mind the fact that there is no evidence that greenhouse gases have anything to do with global warming in the first place.

No sir! None of this matters to Barack Obama and the socialists in Congress.

Because what they really want is to control your life and mine...

... and we allow them to succeed at our nation's peril!

Which is why I have rushed you this urgent letter.

And why I hope and pray you will respond today by signing your PETITION TO PRESIDENT BARACK OBAMA and rushing it back to me without delay.

Your Petition lets the President know that in the United States the voice of the people can still be heard...

... and on the issue of surrendering billions of our hard-earned dollars AND our personal liberty to solve an imaginary "global warming" crisis,

... we loudly and strongly VOTE NO! on both counts!

Yes, Barack Obama thinks he can get away with anything.

And no, the biased media will never tell the American people about this disastrous economy and liberty killing "Cap and Tax" scheme.

But, we can, and we will, with your help.

We can also let President Obama and his fellow travelers know in no uncertain terms that the American people will not forgive or forget what they have done if they go ahead and destroy our nation's prosperity with this outrageous fraud.

Has the earth warmed slightly over the last 100 years? Perhaps.

But there IS NO REAL EVIDENCE that we are responsible for it.

And the real truth is that the radical environmentalists, led by phonies like Al Gore and pampered Hollywood elites, are conning people into thinking "global warming" is the "greatest threat" mankind has ever faced.

Next page, please...

And believe me, this claim is sheer, unadulterated nonsense!

Think about it!

If man is solely responsible for the warming of the earth, how did the ice age ever end without the help of automobiles and coal burning factories?

If "global warming" is truly "global," why are temperatures actually dropping in certain parts of the world and even here in the United States? And why have some glaciers actually grown in size?

I could go on and on -- and on.

But the bottom line is this: The entire "global warming" scare is based on a series of accepted myths put forward by socialists looking to redistribute wealth, phony politicians, greedy scientists and dim-witted wealthy elitists (see Hollywood).

And yes, I have heard those who say, "Wouldn't it be better to be safe rather than sorry?" and "What harm can come from some action by the world's governments to control the possibility we humans are causing climate change?"

The answer to those questions is, it can cause plenty of harm -- and it has over and over again in recent years:

ITEM: The world bans DDT, a substance harmless to humans but proven to weaken bird egg shells.

RESULT: Forty million, and counting, men, women and children in Africa die from mosquito borne Malaria.

ITEM: Environmentalists push government and industry to encourage vast electricity producing windmill farms.

RESULT: Thousands of birds are killed each year by these virtual bird eating machines.

ITEM: The world bans Freon used in refrigerators.

RESULT: Tens of thousands in Third World nations who can no longer afford proper refrigeration are sickened and/or die each year from consumption of spoiled food.

Now please, don't get me wrong.

I am not against taking sensible and commonsense steps to limit pollution and improve the quality of our air and water.

Over, please...

Nor do I deny the world's climate is changing. It is. But it's changing just as it has since the beginning of time...

... by nature and God's Hand, NOT man's!

To suggest otherwise, to suggest that ONLY humans are causing "global warming" and that ONLY humans can reverse it is the height of arrogance and an insult to God and nature alike!

But arrogance is what frauds like Al Gore and the Hollywood elite (who preach energy conservation while driving in stretch limos, flying in private jets and living in 15,000 square foot homes) are all about.

These phonies want you to use mass transit, drive tiny cars, live in tiny homes and pay more for gasoline, energy and just about every product that relies on both.

And THAT is the real goal of Obama's "Cap and Tax" scheme.

Well, I am here to tell you that this scam will not stand!

We also plan on exposing the myth of a "scientific consensus" on "global warming."

Fact is, again, there is no such "consensus."

Honestly, do you know of ANYTHING that EVERYBODY agrees on? There are, however, many scientists who are hoping to cash in on federal grants to "save" you and me from catastrophic climate change.

Bottom line: This outrageous leftist climate and energy scam must be exposed and halted before it's too late.

I hope and pray you agree.

And that you'll join me in this latest drive to rescue our national economy, prosperity and liberty from President Barack Obama's disastrous "Cap and Tax" boondoggle.

My name is Ollie North.

And I am Founder and Honorary Chairman of Freedom Alliance, a grassroots organization dedicated to our traditional American values.

As you may know, I served in the United States Marine Corps for 22 years.

But military service is not uncommon at Freedom Alliance.

Several current and past Freedom Alliance personnel have had long and proud careers in the Armed Forces -- dating back to World War II.

And during our many years of public service, we each served with enthusiasm, because we were defending freedom and the security of the United States of America.

Which is why defending America's security, prosperity, liberty and sovereignty comes natural to us...

... and why we have put exposing the myth of "global warming" at the top of our priority list,

... starting with the prevention of any form of a "Cap and Tax" scheme being imposed on our nation.

But, as is always the case, we cannot do this on our own.

We need the help of tens of thousands of concerned patriots like you on our side.

In short, we need volunteer manpower.

And we need substantial financial resources.

Which is why, in addition to your signed PETITION TO PRESIDENT BARACK OBAMA...

... I also need you to rush back a special, urgently needed gift of \$20, \$25, \$35, \$50, \$75, \$100 or more to Freedom Alliance today.

Please, my friend, try to understand.

Your PETITION TO PRESIDENT BARACK OBAMA will let him know that Americans will not tolerate his "Cap and Tax" scheme...

... and will not forgive or forget its disastrous consequences in the next elections.

Meanwhile, your gift of \$20, \$25, \$35, \$50, \$75, \$100 or more will help Freedom Alliance accomplish our mission.

Some of the goals we want to accomplish are to:

++ expose the truth behind Obama's "Cap and Tax" scheme to the American people and combat the myth of "man-made climate change";

++ bury the Obama White House in an avalanche of Petitions; and

Over, please...

++ recruit a freedom army of 100,000-plus Americans who will support our long-term drive for personal liberty and national sovereignty.

Yes, I know we face tough odds.

Because I understand the full force of the White House, the Congress, the biased media, Academia and Hollywood's stand against us.

But they also stand against the truth and the interests of the United States.

And I believe that if we can successfully reach the people with the facts about both the "Cap and Tax" scheme and the myth of "global warming" -- we can and will prevail against the odds.

But again, we cannot succeed alone.

We need you and other thinking patriots on our team.

So please, act today.

Speed back your PETITION TO PRESIDENT BARACK OBAMA and your most-special and generous donation of \$20, \$25, \$35, \$50, \$75, \$100 or more to Freedom Alliance without delay.

Thank you. God bless.

And may God give us the strength and the wisdom to persevere and prevail in these difficult and dangerous times for our nation and our liberty.

Semper Fidelis,

LtCol Oliver L. North, USMC (Ret.)
Founder & Honorary Chairman

P.S. Again, ever wonder why the liberals now always try to use the new term "catastrophic climate change" rather than "global warming." It's because it allows them to blame EVERY weather event (heat waves, blizzards, floods, draughts, hurricanes, etc.) on you, me and our current use of fossil fuels. The goal? To destroy our way of life and con us into giving away billions of dollars to solve a non-crisis we have no power to prevent, even if it were real! I hope and pray you understand -- and that you will sign your PETITION TO PRESIDENT BARACK OBAMA and rush it and your gift of \$20, \$25, \$35, \$50, \$75, \$100 or more back to me here at Freedom Alliance today.
